

Resume Analysis Report

Generated July 6, 2026 | Role: Senior Frontend Engineer | File: resume_v3.pdf

Strong Match

Above the 75% threshold most ATS-driven shortlists use - a strong candidate for this role.

5 of 8 listed skills matched | 8 keywords matched | 4 keywords to add

MATCHED SKILLS

- React
- Node.js
- MongoDB
- Express
- REST API design

MISSING SKILLS

- TypeScript
- Docker
- GraphQL

MATCHED KEYWORDS

React, Node, MongoDB, Express, JWT, REST, Agile, CI/CD

KEYWORDS TO ADD

TypeScript, Docker, Kubernetes, GraphQL

CANDIDATE STRENGTHS

- Solid full-stack foundation across the MERN stack.
- Demonstrated ownership shipping production features end-to-end.

SKILL GAPS

- Limited exposure to typed JavaScript (TypeScript).
- No containerization or CI/CD experience shown.

RECRUITER REASONING

The candidate's resume aligns well with the core MERN requirements and shows strong hands-on delivery. The main gaps are around typed tooling and infrastructure, which would lift the match into the top quartile for this role.

RECOMMENDED NEXT STEPS

- 01 Add TypeScript to a recent project and surface it prominently.
- 02 Containerize an app with Docker and note the workflow.
- 03 Quantify impact with concrete metrics wherever possible.
